Ultra Dot 350 VHB

Provides sharper dots, print contrast and durability

Printing Blankets: Offset

The Ultra Dot 350 VHB is designed for use in commercial applications where a normal compressible blanket is required. The .020" compressible layer provides minimal gauge loss on installation and virtually no additional gauge loss during its life span. Tests show reduced annual blanket consumption of up to 20%. This blanket gives a solid base to print from, thus making it equal to any on the market for dot sharpness, print contrast and durability. The surface rubber is specially formulated to give this blanket excellent ink transfer and release characteristics from a very highly buffed surface. The Ultra Dot 350 VHB may also be used in some sheetfed applications. It is available in very high buff and high buff.

Advantages of Ultra Dot 350 VHB

- Highest print quality
- Extremely durable
- Excellent ink laydown
- Longer press life
